

Proposal for MN Plastic Surgery

Dear Dr. Chaudhry,

We have read your brief carefully. Your brand book, your references, your vision. Every detail absorbed.

Thank you for choosing **PandaCodeGen**

We commit to bringing your vision to life exactly as you see it. No shortcuts. No templates. No compromises.

Your brand was built on excellence. Our build will meet it.

APRIL 2026

Made with **GAMMA**

What We Understand About MNPS

Every plastic surgery practice ships the same website. Blue corporate templates. Stock photography. Predictable contact forms. You rejected that standard inside the operating room. Your digital presence should reject it just as clearly.

Your practice is defined by four principles:

- | | |
|---|---|
| 1 | Identity-Aligned Results
Not industry trends. |
| 2 | Deep Listening
Not rushed consultations. |
| 3 | Revision Expertise
Corrective honesty. |
| 4 | Gender-Affirming Care
Delivered with respect. |

❏ Your website should communicate all four within three seconds of arrival. That is the standard we build toward.

The Current Reality

The existing site represents strong intention with incomplete execution.

Unfinished WordPress Build

Across 57 to 60 pages.

Partial SEO Work

Fragmented across plugins.

Plugin Overload

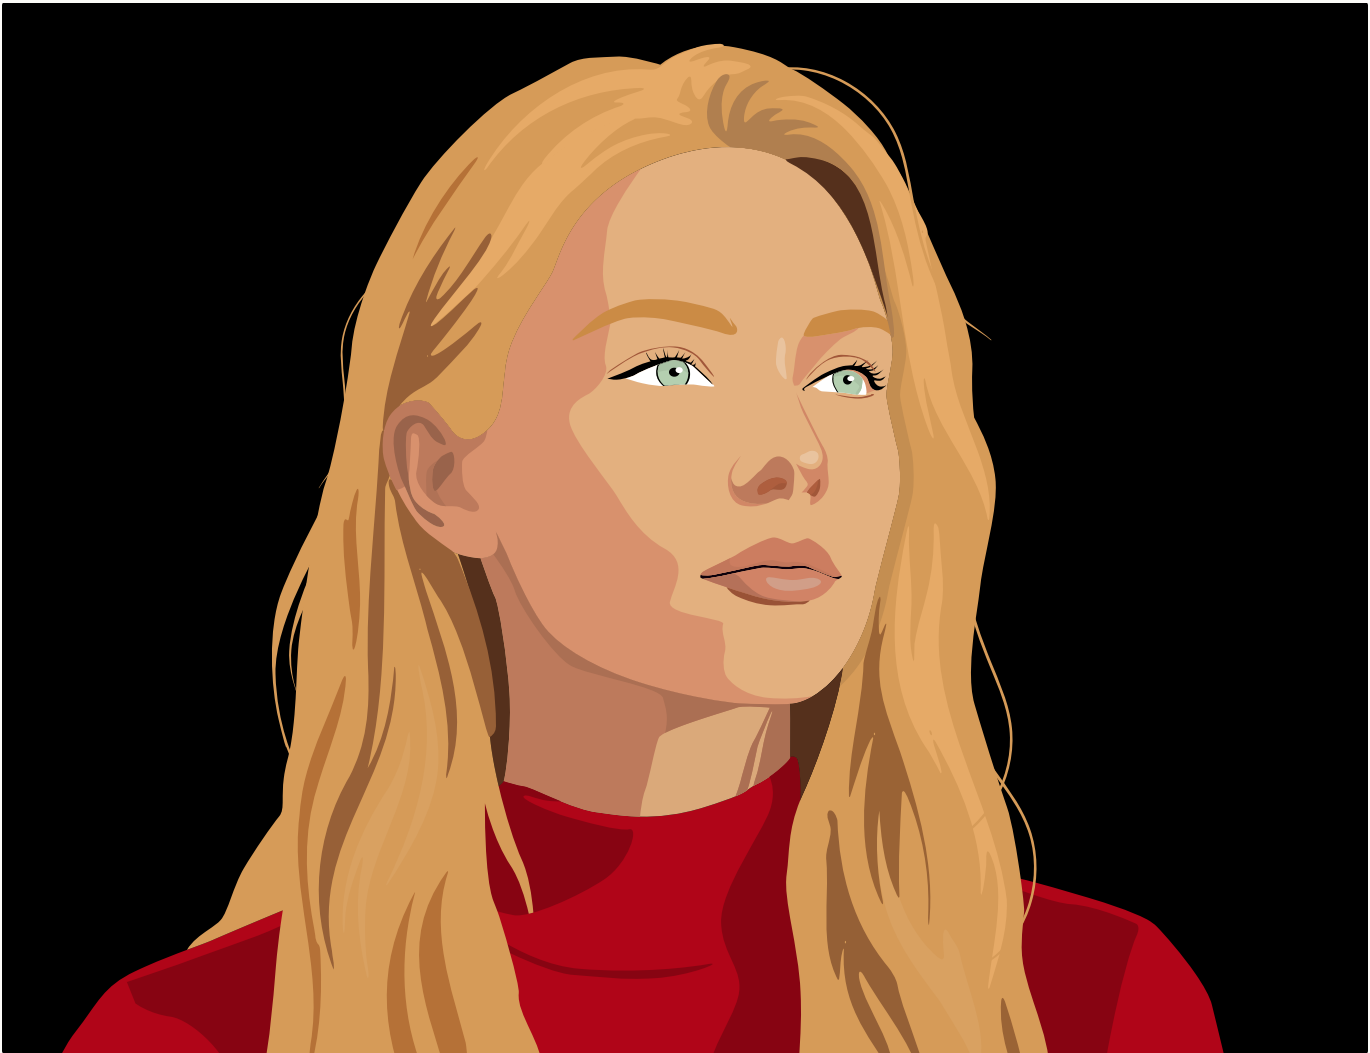

Elementor and twelve additional plugins carrying load time past three seconds.

Hostinger Shared Hosting

Not built for the traffic or performance your practice demands.

AI-Unreadable Architecture

Architecture not readable by modern AI agents.

⚠ You face a hard choice between finishing WordPress or outgrowing it. Finishing WordPress is not the goal. Outgrowing it is.

What We Build

A complete custom website engineered on the same principles that define your practice.

Scope

- 57 to 60 pages designed to your Malika Favre inspired identity
- Interactive Recovery Calculator, animated and procedure aware
- Finance Calculator with procedure level payment estimation
- Procedure level SEO with Minneapolis local schema
- Full content migration with 301 redirect map to preserve ranking authority

Engineering Stack

- Next.js 16.2 with App Router, React Server Components, Incremental Static Regeneration
- Sanity CMS, GROQ queryable by AI agents
- Vercel Edge hosting, global and fully managed
- Tailwind CSS v4, mapped to your exact brand tokens
- Framer Motion and GSAP for your animated illustration system
- Schema.org Physician and MedicalBusiness structured data

✅ The same stack Nike, Stripe, and Notion deploy on. No WordPress. No plugins. No compromises.

Design System

Your brand, implemented exactly. Not reinterpreted. Not simplified. Not templated.

Brand Colours

Bone, Marrow, Blood, and Lymph mapped to exact hex values from your guidelines.

Typography

Instrument Sans, Instrument Serif, and Eclisse licensed and self hosted on Vercel.

Illustration System

Your existing SVG illustration library animated with scroll synchronised sequences.

The Black Swan

Established as your signature motif across loading states, empty states, favicon, and 404 page.

The brand book you invested in becomes the specification sheet we build to.

AI-FIRST ARCHITECTURE

Built for the Search Engines of 2026

Every procedure page ships with structured data designed for ChatGPT, Claude, Perplexity, and Google AI Overviews. Your Sanity CMS content is queryable by AI agents on demand.

You can instruct Claude Code to update a procedure page and the change will propagate correctly. The architecture is engineered for that workflow from day one.

You use Claude. We build sites Claude can read.

Scope & Investment

One price. One scope. Zero change orders.

\$10,000

Phase 1 Build

Fixed price. No hourly billing. No surprise invoices.

30%

Deposit to Begin

\$3,000 USD upfront.

70%

Due on Launch

Balance due on launch day.

8

Weeks to Delivery

6 to 8 weeks from kickoff to launch.

Out of Scope for Phase 1

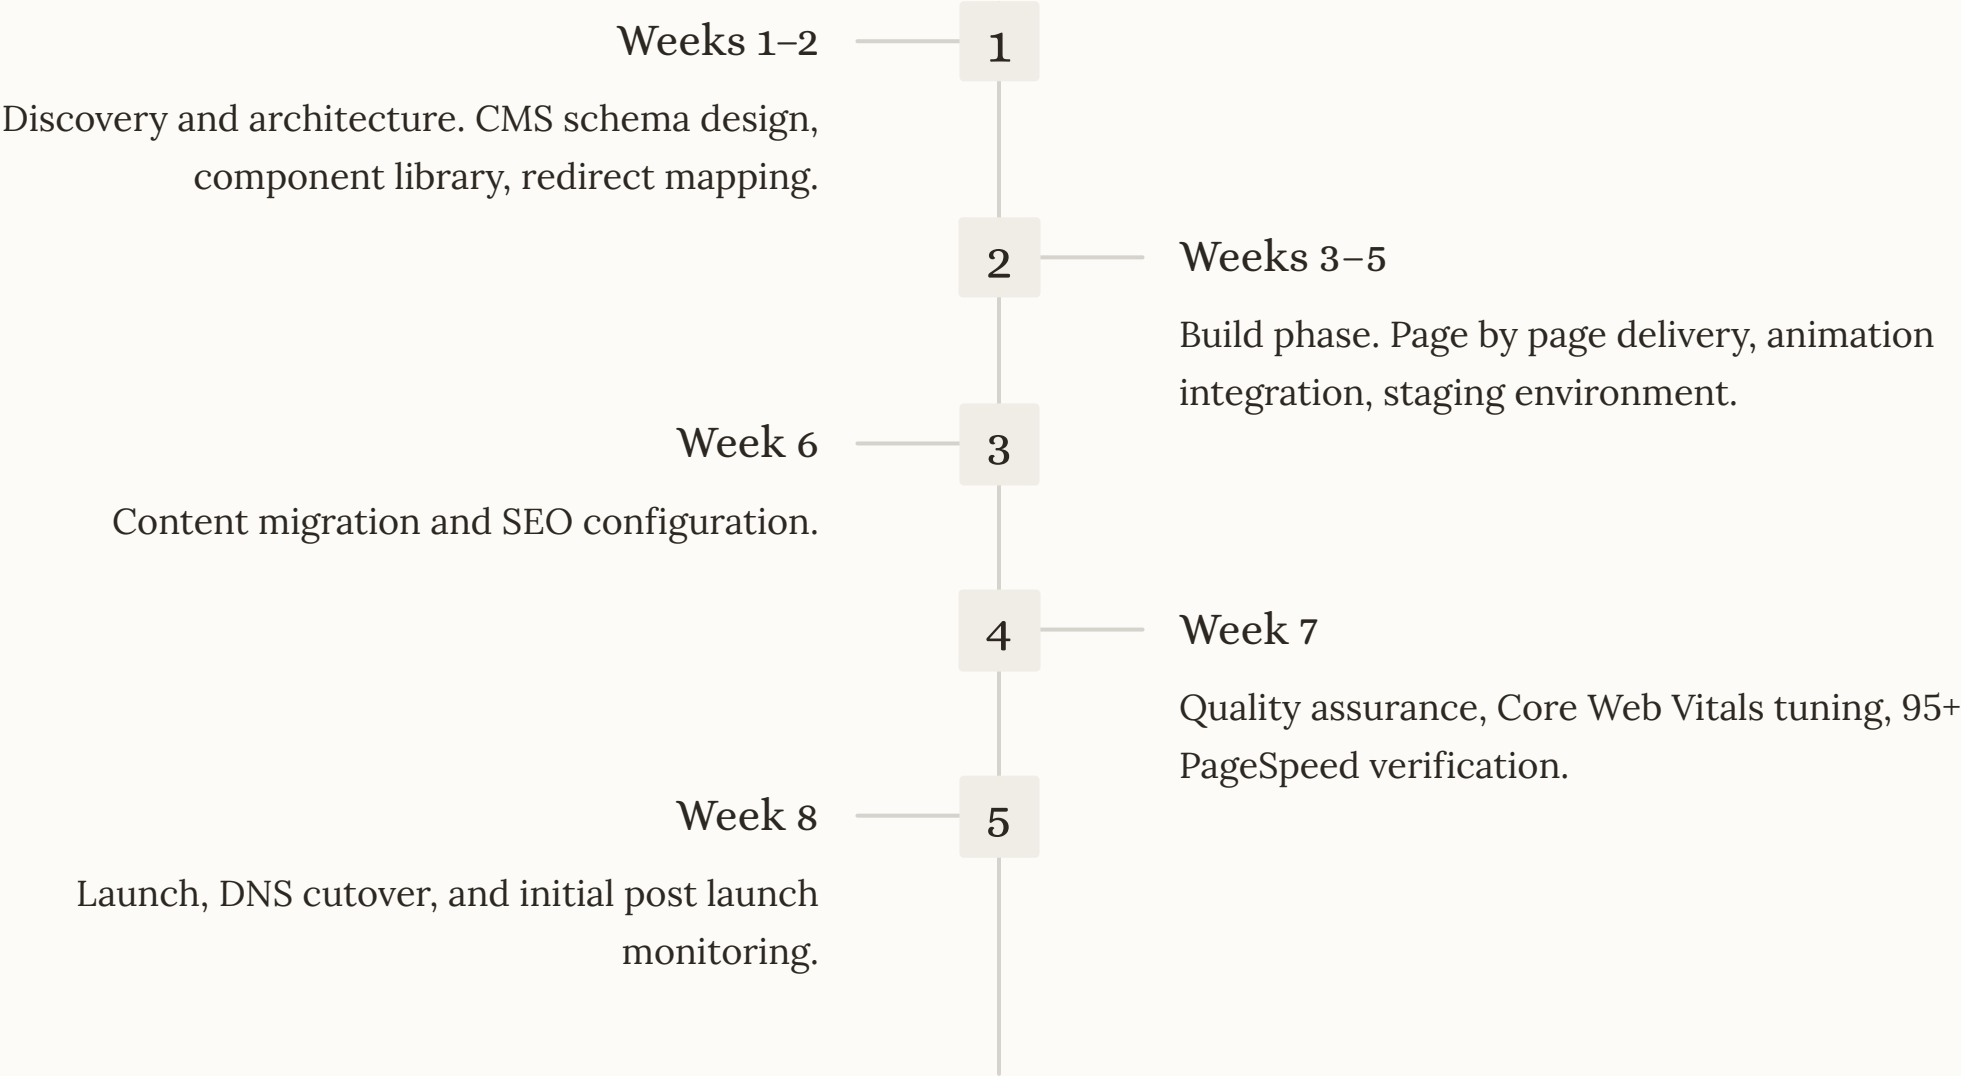

- Patient portal or HIPAA regulated EMR integration
- Multi location support, reserved for future expansion
- E commerce transactions
- Deep GHL CRM automation (your GHL specialist continues to own this layer)

Why This Rate

This rate sits below our standard Scale Plus tier because you brought the brand. We invest when excellence is already in the room.

Timeline

6 to 8 weeks. Four phases. No rushing. No good enough. No surprises.

Our Commitment

1. Mobile Responsive Across Every Device.

Engineered for every screen size, from phone to desktop.

2. 90 Plus Google PageSpeed on Mobile.

Measured and documented at launch.

3. Sub 1 Second Load Time.

On modern devices, across global edge regions.

4. 30 Days of Post-Launch Support, Included.

Bug fixes, content adjustments, and refinements. Yours at no extra cost.

5. 30 Day Satisfaction Window.

If we miss any commitment we made, your investment is protected.

6. You Own 100 Percent of the Code.

From day one. No licensing fees. No platform lock-in.

7. Minimal Infrastructure Cost. Vercel hosting runs \$0 to \$20 per month depending on traffic. Compared to WordPress managed hosting at \$39 to \$99 per month plus plugin subscriptions, your monthly cost drops by 70 to 90 percent after launch.

We earn the relationship. Not with promises, with delivery.

Next Step

01

You Approve the Proposal

02

30% Deposit Lands

\$3,000 USD.

03

Kickoff Call Scheduled

Within 48 hours.

04

First Staging Preview Delivered

Within 2 weeks.
